

ACR® ALCHEMCO CLEAN & REPAIR L43

ACR® L43 Crack Filler ✓

ACR® L43 is an interminable crack filler designed to use with Alchemco waterproofing systems. This surface applied accessory gives trafficable protection after only four hours of application to your cement or concrete structure. L43 effectively blocks water from entering your structure through non moving cracks or voids that are filled with this cementitious crystalline crack filler. The insoluble crystals that develop in the water bearing capillaries, strengthen the surrounding concrete, giving your structure lifetime permanent water tightness.

ACR® Repair & Maintenance Products ✓

Integrate our complete line of ACR Surface Preparation Products with TechCrete® Waterproofing System, & CretePro® Waterproofing Products, to achieve the maximum positive results for your concrete projects!

These cost-effective repair and maintenance products provide your projects with the absolute best sustainable products available in the marketplace today. Give us a try!

ALCHEMCO

Alchemco products are changing the market's perception of what 'long-term' waterproofing protection means. Why build structures with a design life of 50-100 years then protect them with products that are designed to only perform for 5-10 years?
