

# CretePRO® FASTRAC

**Fast Application for Elite Protection**

## CretePRO® Waterproofing Systems

Using these sub-surface, gel-forming waterproofing systems gives owners the best protection that is affordable. CretePRO® was designed by owners for owners to spray apply this subsurface barrier for protection on any concrete surface.

These cost-effective Waterproofing Systems provide owners with the absolute best sustainable products available in the marketplace today. Give us a try!

## ALCHEMCO

Alchemco products are changing the market's perception of what 'long-term' waterproofing protection means. Why build structures with a design life of 50-100 years then protect them with products that are designed to only perform for 5-10 years?

## CretePRO® FASTRAC

CretePRO® FASTRAC is known for being the fastest and easiest application for long-term affordable waterproofing. Trafficable in under 4 hours, get your crew back to work without worrying about damaging the application area. Fastrac is a vapor permeable gel that fills cracks, pores, and voids in the concrete. Get Ready, Get Set, FASTRAC!

## CretePRO® The Pro's Choice

Water is concrete's #1 enemy for destruction, The modified sodium silicate penetrates into and bonds with the concrete to create a barrier to water, stopping the water from within the concrete rather than on the surface! Warranties are available.

**Trafficable in  
under 4 hours**

**NSF 61 Certified**

**Not Damageable**

## PERFORMANCE

1

### Waterproofing Simplified

Fast & Easy application time designed for owners without having to undergo timely and costly upkeep and maintenance. This spray applied subsurface barrier does not change the appearance of your concrete structure.

2

### Application

CretePro ULTRA PLUS Waterproofing Agent must be applied to a clean, dry, dust-free concrete surface, at least 14 days after the concrete has been poured in place. Existing concrete can be treated first with our ACR Clean and Repair products!

3

### Tested and Certified

CretePRO® The NSF/ANSI 61 is a set of national standards that relates to water treatment and establishes stringent requirements for all equipment and products that come in contact with either potable (drinking) water or products that support the production of potable water. CretePro FasTrac has been UL Certified NSF/ANSI 61.

# CretePRO® FASTRAC

This versatile waterproofing technology has been protecting concrete structures around the world for over four decades. Structures such as: **parking ramps, highway bridges, stadiums, airports, hospitals, universities, high-rises, wastewater treatment plants & marinas.** The combination of rapid application rates, affordable up-front costs, and outstanding life-cycle costing makes this a waterproofing solution that highway departments can't pass up.

This award-winning concrete waterproofing technology helps increase the durability & sustainability of new and existing concrete slabs. Because it forms a layer of protective gel below the surface (inside the concrete), this waterproofing system cannot be damaged or deteriorate. The result is the concrete now has long-term protection from weather & harmful chemicals. The fast & easy application (horizontal or vertical surfaces) means owners can afford to protect their entire concrete structure without having maintenance for years to come!

# CretePRO® WATERPROOFING SYSTEMS

Provide the finest protection available for your concrete. These environmentally friendly products can substantially extend the service life of your concrete, protecting from deterioration for decades not years.

- Fast & Easy Application
- Professional Grade Waterproofing, affordable costs
- Waterproofing gel seals both existing & future cracks
- Vapor Permeable - Moisture won't get trapped!
- Eco-Friendly!
