

ELITE PERFORMANCE COST EFFECTIVE PROTECTION

CretePRO® Waterproofing Systems

Using these sub-surface, gel-forming waterproofing systems gives owners the best protection that is affordable. CretePRO® was designed by owners for owners to spray apply this subsurface barrier for protection on any concrete surface.

These cost-effective Waterproofing Systems provide owners with the absolute best sustainable products available in the marketplace today. Give us a try!

ALCHEMCO

Alchemco products are changing the market's perception of what 'long-term' waterproofing protection means. Why build structures with a design life of 50-100 years then protect them with products that are designed to only perform for 5-10 years?

CretePRO® MASONRY SEALER

CretePRO® MASONRY SEALER protects water and other chemicals from entering the most porous of materials, brick! Our Masonry Sealer is a Spray Applied subsurface gel barrier that will ensure your structure is sustainable and protected against water infiltration, freeze thaw issues, and contaminants. CretePRO Masonry Sealer is a vapor permeable gel that fills cracks, pores, and voids in the mortar joints.

CretePRO® The Pro's Choice

Water is concrete's #1 enemy for destruction, The modified sodium silicate penetrates into and bonds with the concrete to create a barrier to water, stopping the water from within the concrete rather than on the surface! Warranties are available.

Protects Mortar and Masonry

NSF 61 Certified

Spray Applied Subsurface Barrier

PERFORMANCE

- 1 Complete Protection**
CretePRO® Masonry Sealer is a bio-based masonry sealer that employs a sodium silicate sealing agent, that is enzymatically modified to chemically bond with the cement in the mortar joints of the masonry.
- 2 Multi-System Compatible**
CretePRO® Masonry Sealer can be used in combination with ACR® Alchemco Clean & Repair Maintenance products and DuraTite® Waterproofing Systems. A 5 year warranty is available when used with ACR® Accelerating Agent and ACR® Crack & Void.
- 3 Tested and Certified**
The NSF/ANSI 61 is a set of national standards that relates to water treatment and establishes stringent requirements for all equipment and products that come in contact with either potable (drinking) water or products that support the production of potable water.

CretePRO®

Masonry

This versatile waterproofing technology has been protecting concrete structures around the world for over four decades. Structures such as: **parking ramps, highway bridges, stadiums, airports, hospitals, universities, high-rises, wastewater treatment plants & marinas.** The combination of rapid application rates, affordable up-front costs, and outstanding life-cycle costing makes this a waterproofing solution that you can't pass up.

This award-winning concrete waterproofing technology helps increase the durability & sustainability of new and existing concrete slabs. Because it forms a layer of protective gel below the surface (inside the concrete), this waterproofing system cannot be damaged or deteriorate. The result is the concrete now has long-term protection from weather & harmful chemicals. The fast & easy application (horizontal or vertical surfaces) means owners can afford to protect their entire concrete structure without having maintenance for years to come!

CretePRO®

WATERPROOFING SYSTEMS

Provide the finest protection available for your concrete. These environmentally friendly products can substantially extend the service life of your concrete, protecting from deterioration for decades not years.

- Fast & Easy Application
- Professional Grade Waterproofing, affordable costs
- Waterproofing gel seals both existing & future cracks
- Vapor Permeable - Moisture won't get trapped!
- Eco-Friendly!
