ACR®

Alchemco Clean & Repair

ACR® system Accessories & Maintenance Products are compatible with all of Alchemco's Waterproofing Systems. These accessory products include everything you need to clean, repair, and provide maintenance to on your project simply and effectively.

Our ACR® product lines include L43 Crack Filler, Concrete & Masonry Etch, Emulsifying Cleaner, Accelerating Agent, Crack & Void Treatment, Concrete & Masonry Cleaner, PolySeal Sealant S+, Polymembrane Flashing, Ceramic Granules, and Rust Converter & Inhibitor.

ALCHEMCO

Alchemco products are changing the market's perception of what 'long-term' waterproofing protection means. Why build structures with a design life of 50-100 years then protect them with products that are designed to only perform for 5-10 years?

ACR® Emulsifying Cleaner

ACR® Cleaner is designed to be used when oil and grease are present in the surface of the concrete. Oil, grease and similar products will stop the proper penetration of the waterproofing agents into the surface of the concrete. ACR Emulsifying Cleaner works by converting oil, grease, fats, and animal by-products into a soapy solution which floats up and out of a surface during the rinsing process. It effectively removes wax off of tile or inlaid floors. Cleans tools and equipment. This emulsifying process permeates into voids, cracks, or concrete surfaces converting the oily matter into a soapy solution permitting easy removal. ACR Emulsifying Cleaner is also excellent for daily use at appropriate concentrations.

ACR® Alchemco Clean & Repair

Integrate our complete line of ACR System Accessories & Maintenance Products with TechCrete® Systems, BridgeDECK® Systems & CretePro® Systems, to achieve the maximum protection available for your concrete projects!

These cost-effective repair and maintenance products provide your projects with the absolute best sustainable products available in the marketplace today. Give us a try!
