Alchemco System Accessories & Maintenance Products

ACR®

Alchemco Clean & Repair

ACR® system Accessories & Maintenance Products are compatible with all of Alchemco's Waterproofing Systems. These accessory products include everything you need to clean, repair, and provide maintenance to on your project simply and effectively.

Our ACR® product lines include L43 Crack Filler, Concrete & Masonry Etch, Emulsifying Cleaner, Accelerating Agent, Crack & Void Treatment, Concrete & Masonry Cleaner, PolySeal Sealant S+, Polymembrane Flashing, Ceramic Granules, and Rust Converter & Inhibitor.

ALCHEMCO

Alchemco products are changing the market's perception of what 'long-term' waterproofing protection means. Why build structures with a design life of 50-100 years then protect them with products that are designed to only perform for 5-10 years?

ACR® Polymembrane Flashing

ACR® PolyMembrane Flashing is a one-component, solvent free, moisture-curing liquid silicone rubber flashing material designed for use on concrete surfaces to work in conjunction with the TechCrete and CretePro Waterproofing Systems.

ACR® PolyMembrane Flashing provides long-term protection because it resists weathering, aging, oxidation, wind-driven sand, rain & snow, the effects of ozone, ultraviolet radiation & temperature extremes typically found on concrete structures. Excellent for vertical surfaces without running. **Available in clear and light gray.**

ACR® Alchemco Clean & Repair

Integrate our complete line of ACR System Accessories & Maintenance Products with TechCrete® Systems, BridgeDECK® Systems & CretePro® Systems, to achieve the maximum protection available for your concrete projects!

These cost-effective repair and maintenance products provide your projects with the absolute best sustainable products available in the marketplace today. Give us a try!
