

ACR® ALCHEMCO CLEAN & REPAIR Rust Converter & Inhibitor

Alchemco System Accessories & Maintenance Products

ACR®

Alchemco Clean & Repair

ACR® system Accessories & Maintenance Products are compatible with all of Alchemco's Waterproofing Systems. These accessory products include everything you need to clean, repair, and provide maintenance to on your project simply and effectively.

Our ACR® product lines include L43 Crack Filler, Concrete & Masonry Etch, Emulsifying Cleaner, Accelerating Agent, Crack & Void Treatment, Concrete & Masonry Cleaner, PolySeal Sealant S+, Polymembrane Flashing, Ceramic Granules, and Rust Converter & Inhibitor.

ALCHEMCO

Alchemco products are changing the market's perception of what 'long-term' waterproofing protection means. Why build structures with a design life of 50-100 years then protect them with products that are designed to only perform for 5-10 years?

ACR® Rust Converter & Inhibitor

ACR® Rust Converter & Inhibitor was developed and created to dissolve and convert rust into a rust preventative compound. ACR Rust Converter & Inhibitor removes rust from iron, steel, aluminum, copper, and brass. It also removes rust stains from other substrates including; wood, painted surfaces, glass and porcelain.

When reinforcement steel is found exposed within a concrete application, and a System warranty is to be issued, ACR Rust Converter & Inhibitor is required to be used to protect the reinforcing steel prior to the application of any system waterproofing products.

ACR® Alchemco Clean & Repair

Integrate our complete line of ACR System Accessories & Maintenance Products with TechCrete® Systems, BridgeDECK® Systems & CretePro® Systems, to achieve the maximum protection available for your concrete projects!
